Descendant Fan Chart

NEW! Charting Companion™ 8

by Progeny Genealogy

If you have your DNA match results and are thinking “now what?”, Charting Companion 8 is a great place to start. Using your Family Tree Maker tree, Charting Companion 8 provides enhanced charting capabilities including color coding, the DNA Matrix chart and Ancestor X-Chromosome chart, among many others.

Learn how DNA ties the members of your family together, get help setting priorities for DNA leads to follow, use the DNA Matches features to group potential cousins into branches of your family tree, and much more...

What's New in Charting Companion 8:

Pastel Colors

Option to “pastel blend” colors expands design options for a more attractive appearance.

Slick Interface

A totally new, improved appearance: more contemporary-looking, consistent with Mac.

Save Work In Progress

A new option to save an editable chart that you are not quite done with, and come back to it at a later date. This means that you don't have to choose between being in a hurry to finish the layout - or starting over later.

Step-by-Step Setup Option

New optional wizard-style dialogs: a simpler, easier interface for new users.

Other new features

Accelerated graphics for large charts, 64-bit architecture, Apple silicon compatibility.

MINIMUM SYSTEM REQUIREMENTS

Windows: Windows Vista and later, including Windows 11, 133 MB hard disk space, 800 x 600 resolution.

Mac: macOS Sierra (10.12) and later, including macOS Ventura (13), 200 MB hard disk space, 1024 x 768 resolution.

FTM 2019 is required. Tree files of other Family Tree Maker versions can be imported as GEDCOM.

Available in the Family Tree Maker Gift Collection at familytreemaker.com
